“It’s more than music, it’s Dust of Soul”

The career of the singer, songwriter and composer Saskia Stäuble (also known as Dusty), born in Basel, Switzerland, and pianist and composer Michael Odermatt (also known as MiKey), born in Lucerne, Switzerland, has started in New York, the city where dreams come true. The first concert performance on the Broadway in Manhattan has been a success and inspiration for the beginning of a great journey from North America to Africa – Tunisia, and Europe, mainly Switzerland and Germany as well as Italy and Turkey.

Dusty and MiKey have been only performing self-composed music and lyrics since Dust of Soul outgrew by their encounter in 2012. Over the past years, Dust of Soul became known for their live experience that is new to the world: “Music Souling”. The melodies, the music, and the lyrics are created completely live what feels as if every guest contributes a huge piece of himself to a symphony that originates within the concert.

A “Music Souling” is powerful with vocalist Dusty’s distinctive voice and touching with pianist MiKey’s lyrical piano-playing crowned with a touch of Broadway Musical. The musical parts are always connected to inspiring stories of Saskia & Michael about living the dream and changing from “normal” towards the heart’s desire. Practically all facets of the same universal themes of every human being are covered: From the courage to dream big, the determination to pursue the own dream, the belief in the good of people through to dealing with doubt, confusion and clear decisions. The audience perceives Music Souling as a new kind of music genre and describes it as “pure music coming from deep out of the heart”.

Over all one thing is certain: Music is not only a creative work for Dusty & MiKey, it is their purpose in life.
