Everything in existence vibrates — from the tiniest atom to the human soul. Science and spirituality agree: we are energetic beings in a universe of frequency. When we tune into higher vibrations like gratitude, love, and joy, we attract experiences that match those frequencies. This is the essence of abundance.

The **frequency of abundance** is not just about material wealth — it's a **vibrational state of being aligned with flow, creativity, harmony, and limitless potential**. When you shift into this frequency, life begins to reflect your inner richness: new opportunities, greater peace, and deeper fulfillment.

In this transformative 90-minute session, the visionary musical duo **Dust of Soul** will guide you into that frequency through a unique blend of **live 888 Hz music, meditation, intuitive soul connection and abundance**. Known for their powerful ability to see into the hearts of souls, **Saskia's vocals** and **Michael Angeles' piano** create a sacred soundscape that opens your energy field to healing and expansion.

You'll be immersed in the gentle yet powerful resonance of **888 Hz** — a natural frequency known to harmonize the body, clear the mind, and connect you with your true self. This is music as medicine, sound as soul-language, and presence as a portal to abundance. Let go of limitation. Awaken to your natural state of abundance. Reconnect with your soul's rhythm. Receive the healing vibrations waiting just beneath the noise. **Space is limited — reserve your spot now for this extraordinary encounter with the music of your being**

**Free Event.
